

Senior Associate Consultant

HARISH B V

Phone: (+91) 8939268143

Email: mailmeharish6797@gmail.com

Address: No-2A DGM Ramakodi apartment, South Sanathi Street, Maruti Nagar, Rajakilpakkam, Chennai- 600073

LinkedIn: <https://www.linkedin.com/in/harish-b-v-23b0a2127>

Profile

Experienced DevOps Engineer and Petroleum data analyst with a strong foundation in oil and gas operations, delivering secure, scalable cloud solutions and automation for enterprise drilling platforms. Skilled in optimizing infrastructure across AWS and Azure, with deep expertise in CI/CD, containerization, and real-time deployment strategies tailored to upstream workflows.

Work Experience

SENIOR ASSOCIATE CONSULTANT – INFOSYS, Chennai, India – June 21 – Mar 25

Clients: BP, Azule Energy, Petronas Mexico, Equinor, Pemex

Oil & Gas Application Deployment

- Deployed Halliburton's DecisionSpace 365 applications (OpenWorks, OpenWells, DSG, EDT & EDM) on AWS and Azure, tailored for upstream exploration and production workflows
- Automated infrastructure provisioning using Terraform and Ansible to support scalable, secure environments for oilfield operations
- Containerized subsurface and drilling applications with Docker and Kubernetes to improve performance, reliability, and portability across production systems.

Data Migration & System Reliability

- Led Oracle database migrations and OpenWorks upgrades for critical oilfield data systems, ensuring seamless transitions and minimal disruption to exploration workflows
- Diagnosed and resolved recurring system issues, implementing automation and workflow optimizations to enhance uptime and operational efficiency.

DevOps, Agile & Software Enhancement

- Built CI/CD pipelines to streamline deployment of reservoir modelling and drilling analytics tools, accelerating release cycles and improving version control
- Applied Agile methodologies to improve user experience for geoscientists and engineers, managing backlog and QA validation through Azure DevOps
- Collaborated with cross-functional teams on R&D initiatives to enhance DecisionSpace modules, integrating new features based on field feedback and evolving subsurface data requirements
- Contributed to innovation in oil and gas software by researching emerging technologies and incorporating them into production-grade solutions for better data visualization, predictive modelling, and decision support

PETROLEUM DATA ANALYST – TECH MAHINDRA, Bengaluru, India – May 19 – June 21

Client 1: Chevron

Engineering Analysis & Field Decision Support

- Conducted detailed engineering evaluations to support on-site and remote decision-making during complex drilling operations
- Delivered timely operational insights through predictive simulations, helping teams anticipate challenges and adjust strategies proactively
- Flagged deviations in real-time, escalating alerts related to excessive shock and vibration, abnormal torque and drag, and inefficient hole cleaning practice.
- Applied advanced analytical techniques such as torque and drag modelling, hydraulic simulations, vibration mode assessments, and ROP/MSE optimization to generate actionable insights
- Supported drilling teams with data-driven recommendations to improve rate of penetration, reduce mechanical wear, and optimize energy transfer downhole hazards.

Client 2: ExxonMobil

Real-Time Drilling Operations

- Oversaw multiple drilling rigs simultaneously, identifying opportunities to enhance operational efficiency and reduce risk exposure across diverse wellsite conditions
- Maintained continuous surveillance of drilling parameters to ensure optimal execution, procedural compliance, and alignment with drilling programs
- Interfaced directly with client real-time operations centres to communicate critical recommendations that improved drilling performance and mitigated downhole hazards.
- Recorded daily drilling operations using WellView, capturing rig activities, fluid usage, and key performance metrics. Ensured accurate documentation for compliance, analysis, and operational reporting across multiple wellsites.

Educational qualification:

Bachelors of Technology: Anna University, Chennai, India (2014-2018)

Petroleum Engineering. CGPA - 7.62

Executive PG Program in Data Science: IIIT Bengaluru, India (2022-2023)

CGPA – 3.4/4

Advance Cloud Computing & DevOps Certification Program: Learnbay Institute (2024 – till date)

Skill Summary:

Automation & Scripting:

Ansible, Terraform, Python – for infrastructure setup, CI/CD, and operational automation

Cloud & DevOps:

AWS, Azure – deploying oilfield apps, optimizing cloud workflows

Database Management:

Oracle – migration, tuning, and support for drilling data systems

Oil & Gas Software:

OpenWorks, OpenWells, WellView, DSG, EDT, WOW, Dweb, petrel
