

# CHIRAG JAIN

Senior Consultant

## PROFILE

With a decade of experience in the IT industry, I specialize in delivering exceptional operational excellence and incident support. I have also contributed significantly as part of DSIS WF SRE team for deployments and performing smoke testing, proficient in troubleshooting and resolving issues across both cloud and on-premises environments. My career includes valuable experience in projects for prominent Oil & Gas corporations, where I've served as a versatile professional adept in Quality Assurance within Agile methodologies.

## CONTACT

**PHONE:**

**ADDRESS:**  
562, Teachers Colony, Koramangala  
Block-1. Bengaluru, India  
PIN Code: 560034

## SUMMARY

---

- Skilled in Functional, Integration, Regression, and API Testing (Postman).
- Experienced in upstream projects for application development, including working as QA in the Wireline Logging InSite application and various DSIS Web framework applications like Enterprise-Search, Admin-App, DSDQ.
- Proficient in Agile development with ability in web-based app testing on Windows and Linux Server environments.
- Domain knowledge includes Geophysics, Formation Evaluation, Seismic Data Processing and Interpretation.
- Expertise in the full Software Test Life Cycle (STLC), from requirement analysis to test execution, defect management, and test summary preparation.
- Certified as a Microsoft Technology Associate with a Python Programming Certification, achieving a score of 91%.
- Presented and published few technical papers at The Society of Petroleum Geophysicists International Conference & Exposition.
  - [Effect of Seismic Wavelet Phase on Post Stack Inversion](#)
  - [MASW versus Refraction Seismic Method in terms of acquisition and processing of data and the accuracy of estimation of velocity profiles](#)

## EDUCATION

---

**IIT(ISM) Dhanbad**

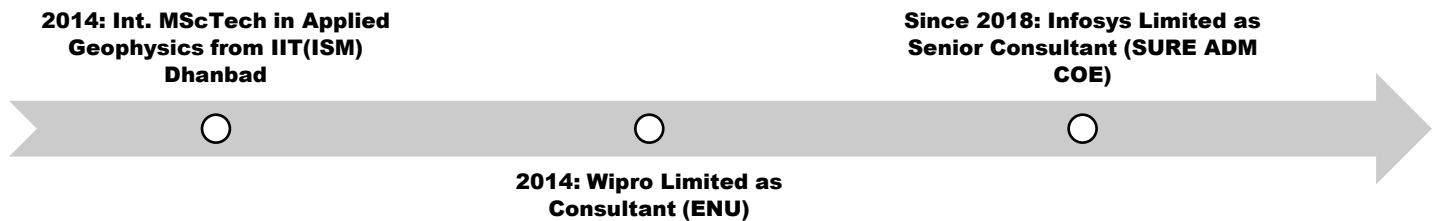

2009 – 2014

- Master of Science Technology (Under 5-Year Integrated Program) in Applied Geophysics.

- OGPA: 7.95 out of 10.0 on the absolute grading.

## WORK EXPERIENCE

---

### Infosys Limited (Senior Consultant)

Oct 2018 – Present

#### Projects

##### 1. LANDMARK, HALLIBURTON (DSIS WF)

**Product:** Enterprise-Search, Admin-App, DSDQ Web-dashboard, Completeness Control Apps

**Period:** October 2018 to November 2019 | August 2021 to present day

**Description:** Enterprise Search combined with the full DecisionSpace Integration Server (DSIS) offering allows companies to find relevant information faster, transfer data between connected databases, and collaborate across geographies, all from a single, fully integrated platform.

#### Role and Responsibilities:

- Currently working as Quality Analyst and SRE for DSIS WF applications in Research and Development Team.
- Validated various microservices to ensure they are optimized for multi-tenancy cost- optimization technique.
- Validated various search, transfer, visualization workflows for enterprise-search application.
- Responsible for deployment of Spotfire server (on-prem) for analytics dashboards.
- Creating and executing Test Cases, reporting and analyzing defects.
- Incident Support: Handling L1 & L2 support calls to troubleshoot and resolve configuration issues.
- Minimizing risks by detecting as many defects as possible before new releases of applications are rolled-out.
- Coordinating with multiple geographically distributed teams for any blockers affecting our application workflows.

##### 2. ExxonMobil (iRMS)

**Product:** Integrated Reservoir Modelling and Simulation Software

**Period:** November 2019 to June 202

**Description:** This reservoir modelling and simulation application provides insight on the data provided by geologists and geophysicists. It also simulates the oil and gas production for a well/reservoir. These help the reservoir engineers to predict the production for any specified days/years and hence take the necessary decisions/actions.

#### Role and Responsibilities:

- Worked as Domain Consultant to bridge the gap between technology implementation and domain perspectives.
- Functional & Regression Testing of Application. Creating test designs for enhancements in software
- Signing-off test designs for automation.
- Creating Python Scripts to validate various PnCs of reservoir models built in application.
- Creating demo deck every sprint with multiple KPI's demonstrating the progress of testing efforts of team.
- Delivering KT sessions on domain aspects to project team members for improving the understanding about product and domain concepts behind application enhancements.
- Delivering monthly domain KT session for entire account members (500+).

## Wipro Limited (Consultant)

Sep 2014 – Oct 2018

### Projects

#### 1. Wireline and Perforating, HALLIBURTON (WLI & HPTK)

**Product:** WLI (Wireline Logging InSite) & HPTK (Halliburton Perforation Toolkit) Software

**Period:** July 2015 to October 2018

**Description:** This application controls the open-hole and cased-hole wireline logging services that encompasses ultramodern downhole logging tools, a higher data rate telemetry system and a powerful PC-based surface system. In short, this application controls the entire logging operations like when, where and up to what the logging tools would survey the borehole.

#### Role and Responsibilities:

- Worked as Domain Consultant to enhance testing capabilities of Wireline logging application development & maintenance.
- Functional & Regression Testing of the features of application.
- Creating test designs to cover various application workflows and new enhancements.
- Collaborating with client for defect and requirement analysis and showing the test product post validation.
- Creating geoscience artifacts for Energy COE - Wipro Limited for enhancing domain capabilities of the organization.
- Providing inputs from domain perspective to management to help in response to RFPs.

### CERTIFICATION

---

- [Petrel and Studio Fundamentals](#)
- [OWASP top 10 Web Application Security for Absolute Beginners](#)
- [Secure Product Lifecycle 101](#)
- [Certified Microsoft Technology Associate, Python Programming Certification](#)
- [Infosys Global Agile Certification](#)
- [Consulting Approach to Problem Solving by Udemy](#)
- [Blockchain and Bitcoin Fundamentals by Udemy](#)
- [Oilfield Safety by IHRDC](#)

### SKILLS

---

- |                        |                                 |                                    |
|------------------------|---------------------------------|------------------------------------|
| ▪ Geophysics           | ▪ Wireline Loggin InSite & HPTK | ▪ SRE for AWS and Azure cloud apps |
| ▪ Formation Evaluation | ▪ Familiar with Jason           | ▪ Problem-solving ability          |
| ▪ Petroleum Geology    | ▪ Agile Methodology & ADO       | ▪ Detail-Oriented                  |
| ▪ Petrel and Studio    | ▪ Quality Assurance & Control   | ▪ Willingness to learn             |
| ▪ DSG, DSIS, OpenWorks | ▪ Postman API Testing           | ▪ Initiative-taking attitude       |
