

CHINMAYA KAMBOJ

QUALITY ANALYST ☎ +18482135380

◦ DETAILS ◦

Authorized to work in US on L2S
Visa without sponsorship
[+18482135380](tel:+18482135380)
kamboj.chinmay@gmail.com

◦ SKILLS ◦

Agile Scrum Methodologies
Software Testing
Project Management
SQL
Python
Power BI
Microsoft Excel
Real time Drilling Monitoring
Well Log Data Interpretation
Oil and Gas Drilling
Surface Logging/LWD

◦ TOOLS ◦

Azure Dev Ops
Jira
Docker/ Kubernetes
Github/Postman

PROFILE

- Petroleum Engineer and QA with 12+ years of experience
- Experienced Quality Analyst with 7 Years of experience in Testing Halliburton Landmark suite of applications.
- Expertise in designing, organizing, and executing test strategies, plans, and test suites to ensure end-to-end software quality.
- Skilled in functional, non-functional and usability testing, along with regression testing.
- Hands-on experience with Azure DevOps, Power BI, and defect management tools for transparent test tracking and reporting.
- Adept at collaborating with development teams to analyze defects, perform root cause analysis, and ensure timely issue resolution.
- Strong knowledge of SDLC, and Agile methodologies, ensuring alignment of QA processes with project requirements.
- Experienced in reviewing requirements documents, improving test coverage, and ensuring user documentation accuracy.
- Experienced with working in Agile teams and well versed with Agile Scrum & Kanban Methodologies
- Excellence in Real Time Log Data Interpretation, Formation Evaluation, Mudlogging
- Proficient in working with distributed teams in Agile Environment and testing Halliburton Landmark's Decision space 365 Cloud and on prem based applications.
- Excellent problem-solving, communication, negotiation, analytical, presentation, and multi-tasking skills with proficiency at grasping new concepts quickly and utilize the same in a productive manner

EMPLOYMENT HISTORY

Senior Consultant at Infosys

March 2023 — Present

Project Manager/ Business Analyst for British Petroleum

- Successfully led a team of analysts supporting BP's upstream digital portfolio, ensuring accurate financial tracking, data governance, and program-level visibility.
- Developed and implemented project tracking processes aligned with business milestones, improving delivery cadence and cross-team coordination.
- Collaborated with VPs, senior stakeholders, and cross-functional teams to define strategic goals, set delivery roadmaps, and align project execution with BP's business objectives.
- Led the design and rollout of Power BI dashboards that translated complex project and financial data into clear, actionable insights — accelerating executive decision-making and enabling early identification of risks.
- Managed portfolio-level budgets, forecasts, resource allocations, and vendor financials through ServiceNow, significantly improving cost control, reporting accuracy, and operational efficiency.
- Aligned KPIs and delivery metrics with strategic outcomes, partnering with leadership to ensure transparency, stakeholder buy-in, and continuous governance improvement.
- Identified risks related to project cost, resource bottlenecks, and delivery delays; escalated proactively with mitigation plans aligned to governance standards

Senior Consultant/ Quality Analyst at Infosys Ltd, Bengaluru

January 2016 — February 2023

Senior Quality Analyst for Halliburton Landmark

- Designed and implemented comprehensive test strategies, plans, and test suites in collaboration with Product Owners and developers, ensuring business and technical requirements were fully met.
- Translated business requirements into functional and non-functional test cases for DSIS web-based applications across on-prem and cloud environments.
- Participated in Agile ceremonies such as backlog grooming and sprint planning, prioritizing features based on business impact and user value.
- Developed and maintained test plans, scenarios, and automated regression scripts to enhance release efficiency and reduce manual testing efforts.
- Worked closely with DevOps teams to support CI/CD testing workflows and deployment of tested features in AWS/Azure using Docker and Kubernetes.
- Conducted Root Cause Analysis (RCA) to identify bug patterns, reduce defect recurrence, and improve product stability.
- Utilized Azure DevOps for defect tracking, reporting, and documentation, ensuring transparency and timely resolution of issues.
- Collaborated with the QA Automation Engineer to review automated test results and integrate them into continuous testing pipelines.
- Contributed to improving software development standards, testing methodologies, and user documentation, ensuring usability and integration effectiveness.
- Performed API testing using Postman, validating request/response payloads, status codes, and integrations to ensure robust backend functionality.
- Worked as a Site Reliability Engineer (SRE), ensuring system reliability, scalability, and performance through proactive monitoring, incident management, and automation of deployment pipelines.

Logging Geologist at Weatherford, Abu Dhabi

March 2013 — November 2015

- Executed Monitored real time Drilling Parameters (ROP, WOB, Torque, Mud Weight, Gas Levels) to assist in critical well control decisions and ensure safe drilling operations.
- Collected, Prepared and analyzed drill cuttings for lithological classification and hydrocarbon evaluation across multiple wells.
- Delivered high accuracy geological logs and daily reports using logging software, supporting client side geologists and drilling teams.
- Detected gas influxes and abnormal pressure zones using chromatograph and total gas analysis, helping to avert potential well control incidents.
- Maintained continuous communication with company men, drilling engineers, and wellsite geologists to synchronize geological interpretation with drilling progress.
- Ensured 100% data quality and adherence to Health, Safety and Environment protocols during Logging Activity.
- Collaborated closely with LWD Engineers to correlate surface lithology and gas readings with real time downhole data (Gamma ray, Resistivity, Density)
- Gained working knowledge of LWD Tool functions and telemetry behaviour, enabling informed discussions during tool response anomalies or data mismatches.
- Cross referenced gas peaks with LWD Log responses to validate hydrocarbon shows and identify potential pay zones.

Mudlogger at Geologging Industries, Mumbai

November 2011 — January 2013

- Conducted continuous monitoring of drilling parameters and surface gas trends to provide real time geological support for directional wells in Himachal Pradesh and Rajasthan.
- Performed systematic collection and microscopic analysis of drill cuttings to identify formation lithologies, aiding in accurate formation tops and correlation.
- Prepared detailed lithological logs and daily geological reports, supporting drilling engineers and client geologists in efficient drilling operations.
- Documented stratigraphic sequences and assisted in regional geological mapping based on field observations and sample analysis.

EDUCATION

Petroleum Engineering, University of Petroleum and Energy Studies, India, Dehradun

January 2007 — October 2011

12th Class, Brightlands School, India

January 2006

10th Class, Brightlands School, India

January 2004

DOMAIN PLATFORM AND TOOLS

 Halliburton Landmark DSIS

 Palantir Foundry

 Halliburton Landmark EDT

COURSES

 Microsoft Power BI Analyst Course

 Google Project Management

 Safe Certified PO/PM

 Enrolled in Product Manager Certification from Indian School of Business
