PROFESSIONAL SUMMARY

Experienced Petroleum Engineer with 10+ years of expertise in drilling engineering, software quality assurance, and upstream digital solutions. Proven track record in leading cross-functional teams, driving software strategy, and delivering data-driven solutions that optimize drilling operations. Skilled at translating complex technical requirements into high-impact software capabilities, ensuring alignment with business goals and operational needs.

CORE COMPETENCIES

- **Drilling Engineering Expertise:** Well planning, BHA and Hydraulics optimization, torque & drag analysis, remote operations.
 - **Software Solutions & QA:** End-to-end software validation, regression testing, performance optimization.
 - **Agile Collaboration:** Sprint planning, user story creation, epic definition, cross-functional team leadership.
 - **Data-Driven Digital Solutions:** Real-time data analytics, AI/ML integration, cloud platforms (AWS, Kubernetes, Kafka).
 - **Business & Operations Alignment:** Requirements gathering, value delivery, user adoption, and performance monitoring
-

PROFESSIONAL EXPERIENCE

Drilling Engineer QA — LTTS (Client: Halliburton)

Sep 2022 – Present

- Led QA efforts for complex drilling engineering software, ensuring well planning, trajectory optimization, and drilling analytics modules function seamlessly.
 - Collaborated with Data Science teams to integrate machine learning models, enhancing operational insights.
 - Worked alongside developers and project managers to ensure software solutions align with business needs.
 - Supported Agile sprints, contributing to sprint planning and ensuring QA efforts align with development cycles.
 - Implemented automated regression testing, ensuring software stability and faster delivery cycles
-

Drilling Engineer QA — Emerson

Dec 2021 – Sep 2022

- Collaborated with technical teams to gather new feature requirements, contributing to software enhancements.
 - Created user stories and epics to guide development teams, ensuring clear understanding of software goals.
 - Managed test plans using JIRA and Confluence, ensuring traceability from requirements to delivery.
 - Supported OpsLink 19p2 and Sysdrill 22 releases, ensuring high quality and on-time delivery.
-

Well Engineer (Consulting) — Schlumberger

Oct 2019 – Dec 2021

- Led pre-drill planning for offshore HPHT wells, working on BHA design, trajectory optimization, hydraulics modelling, and kick tolerance.
 - Delivered real-time data interpretation, providing actionable insights to remote operations.
 - Captured and analysed drilling events, proactively mitigating risks and optimizing well performance.
-

Drilling Analytics Engineer (Consulting) — Halliburton

Aug 2018 – Oct 2019

- Pioneered single-well analytics to identify invisible lost time, defining KPIs and performance benchmarks for offshore drilling fleets.
 - Built custom dashboards using TIBCO Spotfire, improving data visibility and performance analysis.
 - Delivered data-driven reports, engaging clients with performance tracking and operational awards.
-

Operation Support Specialist — Weatherford

Jan 2015 – Aug 2018

- Real-time Data Monitoring: Monitored mudlogging, LWD, and formation test data to ensure data quality and integrity for global operators.
 - Digital Setup & Support: Installed and configured data-transfer systems at rigs, ensuring seamless real-time data streaming.
 - Data Analysis: Delivered real-time data interpretation to support drilling decisions and performance monitoring.
 - Workflow Optimization: Enhanced data workflows for faster rig-to-centre transmission
 - Troubleshooting: Diagnosed data issues and collaborated with rig teams to ensure continuous operations.
-

EDUCATION

Bachelor's degree in Petroleum Engineering — MIT Pune, 2013 | GPA: 3.28/4

DIGITAL & SOFTWARE PROFICIENCY

- **Agile & QA Tools:** JIRA, Confluence, Azure DevOps, Postman
 - **Oil & Gas Software:** Halliburton Landmark EDT Suite (WellPlan, Compass, DecisionSpace365), Emerson- Sysdrill, Schlumberger- Drilling Office, DrillPlan, Techlog TDI workflows
 - **Data & Visualization:** Spotfire,
 - **Cloud Platforms:** AWS, Database – MongoDB & Postgres.
-
