PROFILE

Release & Delivery Management | Agile Execution | Stakeholder Engagement | Risk & Compliance
Strategic and performance-driven professional with 13.9+ years of experience in driving enterprise IT initiatives, Agile transformation, Business Systems Consulting, and large-scale Software Deployments. Proven ability to lead cross-functional teams, bridge business-technical gaps, and deliver high-impact solutions in regulated environments.

WORK EXPERIENCE

Wells Fargo-Sr. Technology Business Systems Consultant
Enterprise Content Management - Imaging Services Project

Feb'2015- Present

- Led Agile-based Delivery and Release Management for Imaging Services, coordinating deployments across Development, QA, and Operations Teams.
- Executed end-to-end release activities including Business Validation, Install Plans, Technical Validation, Smoke testing and Post-release Sanity checks.
- Created and maintained key release artefacts such as Scope Documents, Production Install plans, Release Calendars, Issue Logs, and Communication strategies.
- Facilitated Go/No-Go meetings, Coordinated Deployment Activities, and provided ongoing production support to ensure smooth releases.
- Managed stakeholder communications, including weekly release notes, deployment meetings, and comprehensive technical documentation utilising Jira, Confluence, and ServiceNow.
- Acted as Release Lead for multiple Agile Scrum teams, overseeing Kanban dashboards, monitoring delivery timelines, and ensuring successful sprint and release outcomes.
- Spearheaded Agile ceremonies including Program Increment (PI) planning, sprint planning, daily stand-ups, and retrospectives across distributed Scrum teams.
- Performed Application Deployments using IBM UrbanCode Deploy (uDeploy) in non-production environments, coupled with CI/CD tracking tools to ensure streamlined releases.
- Facilitated Business Requirement Analysis, Risk Management, and Strategic Planning aligned with enterprise goals for Wells Fargo Digital Technology and Innovation Line of Business.
- Delivered KPIs and Trend Metrics to support continuous improvement initiatives and automations.
- Managed Patching, SSL Certificate Upgrades, and Vulnerability Remediation lifecycle for Venafi Certificate Management and Qualys vulnerability Management.
- Executed Infrastructure and Application Deployments via AnthillPro and IBM UrbanCode Deploy, ensuring Compliance with SDLC standards.
- Led initiatives related to Certificate Renewal, Load Balancing (F5), and Data Centre Traffic rollover/rollback. Collaborated with Lines of Business, including Wealth & Investment Management, Consumer Lending and Wholesale Banking.
- Ensured and supported Regulatory Activities for Records and Books governance, WORM impacts for the ECM Content Management Team under Strategic Services and Advanced Technology
- Participated in and led Change Advisory Board (CAB) meetings, Managing Agendas, Stakeholder Communications, and Approval Processes.

CGI - Systems Engineer

Feb'2011- June'2014

Wintel MultiClient Project - Bell Mobility, Bell TV

- Administered Citrix XenApp farms, including VDI setup, patch updates, and ICA session management.
- Supported over 2500+ Microsoft Windows servers; resolved OS, application, and network issues.
- Delivered high-availability solutions using ILO/RILOE, Virtual Centre, and HPOO tools.
- Prepare MOP for server reboots, firmware upgrades, patch installations, RFC (change request) and provide the RCA for the recurring issues, Server crashes & Server Hung issues & so on.
- Performed system performance monitoring and tuning. Participated in capacity planning and systems configuration. Also, Created and configured user profiles. Corrected user flex profiles.
