WORK EXPERIENCE

- **Senior Engineering Lead** at Persistent Systems – Nov'23 to Present
- Senior Devops Engineer at eInfochips – An Arrow Company – Mar'21 to Nov'23
- Devops Engineer at eInfochips – An Arrow Company – Jan'18 to Mar'21

CORE COMPETENCIES

- Cloud Computing
- DevOps Methodologies
- Continuous Integration and Delivery
- Containerization and Orchestration
- Infrastructure as Code
- Monitoring and Logging
- Agile Principles and JIRA, Rely, Swift kanban

EDUCATION

- **B.E (Computer Science and Engineering) | 8.78 CGPA**
Gujarat Technical University, 2017

CERTIFICATION

- **CKA – Certified Kubernetes Administrator**, 2021
- **GCP – Associate Cloud Engineer**, 2020
- **AWS Certified Developer – Associate**, 2019

PUBLICATION

- Krutika Shah, V U Vadiya, and R H Jhaveri, "A survey paper on security in cloud computing: a bibliographic analysis" in Circulation in Computer Science, vol. 1, no. 2pp. 19–23, CS Laboratory Press, New York, USA, 2016

TECHNICAL SKILLS

AWS | GCP | CI/CD tools | Docker | Kubernetes | Jenkins | Harness | Terraform | Helm Chart | Splunk | Instana | AppDynamics | Prometheus | Grafana | Rancher | Shell | Python | Github | SonarQube | Linux/Windows | Karpenter | CloudFormation | GitHub | Github Actions | Automation | Networking | Security | Vulnerabilities | EKS | SDLC | Cost Optimization | Infrastructure as code (IaC)

PROFILE SUMMARY

- Managed 70+ microservices in Kubernetes clusters across multiple environments differentiated by namespaces.
- Experienced to manage more than 8 Kubernetes clusters in different AWS accounts.
- Implemented Horizontal Pod Autoscaler (HPA) for microservices, ensuring optimal scalability and cost efficiency.
- Integrated Splunk logging into Kubernetes manifests, enabling real-time monitoring of pod metrics on Splunk dashboards.
- Experienced in monitoring and observability using Instana, AppDynamics, Grafana and Prometheus for performance tracking, anomaly detection, and alerting in Kubernetes environments.
- Set up CI/CD pipelines in Jenkins for automated deployments, including multi-branch pipelines and freestyle jobs.
- Experienced to create CI/CD pipelines to deploy micro services via Github-Actions on github with setup runner.
- Used AWS ECR for container artifact management and previously worked with JFrog Artifactory.
- Designed and maintained AWS infrastructure for Inflow Platform, including EKS, EC2, VPC, IAM, S3, lambda, DynamoDB, and RDS.
- Configured AppConfig & Secret Manager for secure and dynamic configuration management.
- Strengthened security using AWS Inspector for vulnerability scanning, CloudTrail for audit logging, and CloudWatch for system monitoring.
- Troubleshoot issues in EKS clusters, ensuring high availability and resolving deployment, networking, and scaling challenges.
- Upgraded EKS clusters and node groups to newer versions to enhance security, reduce vulnerabilities, and improve performance.
- Performed rolling updates for node groups, minimizing downtime while applying security patches and performance enhancements.
- Proven track record of providing support and resolving issues during crisis calls, as well as optimizing production environments for scalability
- Installation of Karpenter on existing EKS to get more scalable and optimized cluster

KEY RESULT AREAS

- Troubleshooting any issues that arise during testing and production, identifying and solving issues
- Identifying & monitoring monthly metrics, ensuring adherence to operational standards and consistently applying them; developing & monitoring escalation processes to ensure that SLAs are achieved
- Directing **end-to-end management & monitoring project progress** as per scheduled deadlines for various tasks; steering efforts to ensure timely execution within the stipulated parameters
- Spearheading the development & implementation of procedures for system troubleshooting and maintenance
- Establishing milestones for necessary contributions from departments and developing processes to facilitate their collaboration

POSITION OF RESPONSIBILITY

- **Jul'16 – Jun'17:** Institute Sports Coordinator | SVMIT Bharuch
- **Jul'15 – Jun'16:** Team Lead | Badminton team | SVMIT Bharuch

PERSONAL DETAILS

- **Date of Birth:** 18th September 1995
- **Languages Known:** English, Hindi and Gujarati
- **Address:** Amrutha Heights, Nallurhalli, Whitefield, Bengaluru, Karnataka 560066

HIGHLIGHTS

- Orchestrated **seamless CI/CD processes** on the AWS cloud platform, leveraging Jenkins and optimizing release management
- Streamlined application deployment and scalability by effectively **managing Kubernetes Clusters with KOPS and EKS**
- Engineered efficient and automated resource provisioning by leveraging Terraform to create robust infrastructure
- Leveraged **microservice architecture** to effectively manage Docker containers, optimizing performance with the AWS application load balancer
- Designed and implemented robust AWS Cloud Environments, integrating ELB, EC2, VPC, Route53, S3, CloudWatch, CloudTrail, IAM, ECS, ACM, SNS, EKS, ASM, DynamoDB, RDS, AWS Inspector, Lambda, Secret Manager, and auto-scaling for optimal performance
- Utilized cutting-edge cloud services, including EC2, auto-scaling, and VPC, to construct robust, scalable, and adaptable systems that effectively handle varying workloads
- **Established VPC peering** between AWS accounts and inter-region VPC peering, enhancing network connectivity and enabling seamless data transfer
- Utilized New Relic, PagerDuty, cloudwatch, Instana, Splunk, AppDynamics, Rancher and Grafana for monitoring and troubleshooting, ensuring optimal performance and proactive issue resolution
- Delivered prompt and effective support to clients during critical P1/crisis calls, minimizing downtime and ensuring unparalleled customer satisfaction
- Adhered to agile principles and leveraged JIRA, Rally, Swift Kanban as a robust ticket management tool to streamline project workflows
- Contributed to product development by enhancing scalability and performance within the production environment

INTERNSHIP

Infochips – an Arrow Company, Ahmedabad

July'17 – Dec'17

Key Result Areas:

- Worked on various programming languages including **Python, Java, JavaScript and HTML**
- Spearheaded the design & development of an innovative gaming application using Python scripting
- **Collaborated with cross-functional teams** to gain comprehensive industry insights and cultivate a diverse set of soft skills

ACADEMIC PROJECT

Project Details: Travelling Web Application

Institution: SVMIT, Bharuch

Description:

Designed and developed a scalable and user-friendly web application for travel bookings, incorporating features such as tour package selection, hotel booking, sightseeing suggestions, taxi/cab booking, travel guides, payment processing, and customer support.
