

Sai Kumar Vema | DevOps Engineer

Email: vemasaikumar328@gmail.com

Phone: +91 6302899691 | LinkedIn: <https://www.linkedin.com/in/sai-kumar-vema/>

Professional Summary

DevOps & Cloud Engineer with 4+ years of experience in **automating, deploying, and managing cloud-native infrastructure, CI/CD pipelines, and DevSecOps practices**. Skilled in **AWS, Kubernetes, Docker, Jenkins, Terraform, and GitHub** with strong expertise in infrastructure automation, container orchestration, monitoring, incident management, and secure deployments. Demonstrated success in reducing **deployment times by 20%**, improving system uptime, and minimizing manual effort through automation.

Technical Skills

- Cloud Platforms: **AWS** (EC2, VPC, Route53, RDS, ECR, EBS, ALB, EKS, Auto Scaling, IAM, ACM)
- Infrastructure as Code: **Terraform, Ansible** (Remote Backend – S3 + DynamoDB)
- CI/CD & Version Control: **Jenkins, GitHub, Git**, Pipelines, Webhooks, **Branching Strategy, Agile/DevOps Methodologies**
- Containerization & Orchestration: **Docker, Kubernetes, Helm, Rolling Deployments**
- Monitoring & Observability: **Prometheus, Grafana**
- Scripting & Automation: **Shell Scripting, Python**
- DevSecOps & Security: **SonarQube, Veracode, SAST/DAST**
- Project Management: **ServiceNow, Jira**

Professional Experience

DXC Technology – Bangalore

DevOps Engineer (Analyst I Infrastructure Service)

Sep 2022 – Present

- Optimized **CI/CD pipelines** for **NodeJS applications**, reducing build & deployment time by 20%.
- Automated provisioning of **AWS VPC, EC2, Security Groups, Route53** with **Terraform**, cutting manual effort by 30%.
- **Integrated security tools** (SonarQube, Veracode, AWS ECR scanning) into CI/CD pipelines, detecting 90% of vulnerabilities pre-production and improving overall DevSecOps maturity.
- Engineered **Jenkins agents & shared libraries**, reducing pipeline failures by 15%.
- Designed **Auto Scaling Groups** ensuring 99.9% uptime and cost optimization.
- Configured **GitHub branching strategies**, pull requests, and webhooks to improve version control, enforce code reviews, and integrate seamlessly with CI/CD pipelines.
- Troubleshoot and resolved AWS VPC peering issues, reducing downtime and maintaining **high availability** for applications.

- Automated deployment of **Kubernetes** workloads with Helm, implementing **rolling deployments** to achieve zero downtime and improve release reliability.
- Set up **Terraform Remote Backend (S3 + DynamoDB)** for centralized state management and locking.

Junior DevOps Engineer (Analyst II Infrastructure Service)

Jul 2021 – Sep 2022

- **Monitored Linux server incidents** (host down, NIC failures, reboots) via ServiceNow, Prometheus, Grafana reducing MTTR by 20%.
- **Implemented automation with Shell scripting** for backups, log cleanup, and Cron-based scheduling, improving system stability, uptime, and operational efficiency
- Streamlined file permission settings and **user management, package management** tasks across 20+ RHEL Linux servers. Achieved a consistent system performance improvement
- Performed EC2 instance & service restarts (Nginx, SSH) under change approvals.
- Coordinated with Major Incident Management during **Production** and **Disaster Recovery** (DR) outages, reducing Mean Time to Resolution (MTTR) by 20%.
- Authored 50+ incident reports and SOPs, ensuring compliance with industry regulations

Education

Bachelor of Technology (B. Tech) – Mechanical Engineering | Aug 2018 – Jun 2021

N.B.K.R. Institute of Science and Technology

CGPA: 8.3/10 – First Class with Distinction

Certifications

- AWS Certified Cloud Practitioner
- ITIL v4 Foundation

Awards & Recognition

- DXC Champs Award (3x) – Recognized for exceptional performance and impactful contributions to team success.
