

Gaurav Gulati

Software Professional

18 years of experience in IT/Software Industry including 9 years in Denmark, Malaysia and China. Bachelor's degree in Electronics and Communication from Delhi College of Engineering. Programming Skills in C, C++, Python, Linux, Network protocols (TCP/IP), SDH/SONET, Optical Networks, CI/CD, Docker, SOILD Principles, Design Patterns, SDLC and Agile Methodologies.

📍 Delhi, India

EDUCATION

Bachelor of Engineering, Electronics and Communication

Delhi College of Engineering (Amongst the top Institute in India)

TECHNICAL SKILLS

Programming Languages C++11/14/17/20, Python, SQL, Shell Scripting, UML

Build and Configuration Management CVS, CMake, Clear Case, Perforce, Mercurial, Git, Github

Debugging Skills dbx, gdb

Data Modeling, Libraries and Frameworks XML, JSON, Yang, REST

Programming Paradigm and Computer Fundamentals Concurrency, Multithreading, Data Structures and Algorithms

Database and O/S MySQL, Oracle, Linux, Solaris

Computer Networking TCP/IP, SNMP, HTTP, Netconf, Layer 2/3, Ethernet

Defect Tracking PVCS Tracker, Clear Quest, Jira

Orchestration Tools, CI/CD Docker, Jenkins

WORK EXPERIENCE

Principal Software Engineer

MTI Radiocomp

06/2024 - 11/2024

Copenhagen, Denmark

Achievements/Tasks

- Implemented energy efficient features of ORAN6 (Open RAN) Performance management on Remote Radio Unit (RRU).
- Languages Used : C++ , Linux Protocol : Netconf

Network Software Developer

Comcores

09/2023 - 05/2024

Copenhagen, Denmark

Achievements/Tasks

- Design and implement a Network Controller . To also monitor a 1G Ethernet Switch using the controller.
- Implement Time Sensitive Networking (TSN) features on the Network Controller from the IEEE 802.1q standards.
- Activities include requirement specifications, coding, documentation (design), unit testing and code reviews.
- Language : C++, Linux. Protocol : Netconf

WORK EXPERIENCE

Expert Software Engineer Nokia Shanghai Bell

06/2019 - 11/2019

Shanghai, China

Achievements/Tasks

- Worked on GPON, layer 2 network protocols like VLAN etc. in Access Fixed Networks group. Group : **L2 Forwarding**, working for the product ISAM (The ISAM is a DSLAM/OLT type access device i.e. it allows subscribers to access Service providers over a public network and bringing fiber to the Home (FTTH). The projects involved enhancements in the code, feature requests related to Layer 2 forwarding and involve concepts of VLAN, QOS, and packet movement from LT to ONT to the subscriber.
- Languages : C++ Operating System : Linux.

Software Architect ACL Digital India

03/2021 - 07/2022

India

Achievements/Tasks

- Worked on Blue Planet Orchestrator. The Core component of the orchestrator is developed in C++.
- Developed Resource Adaptors , Service templates , TOSCA models, Layer 2 Backend Ethernet Services
- Collaborated with clients, project leaders, and business managers to develop business cases for new projects.
- Identified client needs and translated them into viable technical solutions and project opportunities.
- Provided project estimations, ensuring feasibility and resource optimization.
- Managed stakeholder communication, ensuring alignment between internal teams and external partners.
- Conducted reviews of specifications, test plans, and software designs to maintain quality and efficiency.
- Languages : Python
- Operating System and Cloud deployment : Solaris and AWS
- Docker, GitLab, JSON, REST API

Senior Lead Engineer Coriant Networks

12/2016 - 12/2018

Shanghai, China

Coriant was founded upon the powerful combination of Nokia Siemens Networks (NSN) Optical Networks, Tellabs, and Sycamore Networks. Coriant was acquired by Infinera as on October 2018.

Achievements/Tasks

- The projects were based on Sycamore's Silvx and Tellabs 6300 Network Management Systems and using 3rd Generation Optical Network models.
- • Successfully handled products, customer issues and new feature requests. • Main duties involve design, coding, making build releases and product documentation. • Porting of Silvx Manager from Solaris to Red Hat Enterprise Linux planned for 2019. • Received special recognition award from the company in 2017 for the excellent contribution and dedication for quick project deliveries.
- Languages used: C++, Python Protocols : SDH Network Management Systems, CLI, OTN Platform : Sun Solaris

Senior Software Engineer Software AG

04/2016 - 10/2016

Kuala Lumpur, Malaysia

Adabas & Natural R&D Group

Achievements/Tasks

- • Successfully delivered features and enhancements on Adabas Manager which is a product used for managing Adabas database and running many Natural utilities. Natural is a language used to access the database (Adabas). • Got an opportunity to visit and work in the company headquarters in Darmstadt, Germany.
- Platform and Languages: Linux, C, Shell Scripting, Natural for Ajax, VM.

Consultant CSG International

07/2015 - 03/2016

Kuala Lumpur, Malaysia

Provided architecture solutions, which may include research and technical investigation in new developments in Telecom Mediation.

- • Ensured end to end functionality of software is within the scope of business need. • Experience in implementing BSS (Convergent Telecom Billing solution) with IntermediatE. • Good understanding of Telecom Billing Domain and Project Implementation Life Cycle
- Platform: CGDC, Linux

WORK EXPERIENCE

Senior Engineer Finisar Malaysia Sdn Bhd.

07/2013 - 06/2015

Finisar is the world's largest supplier of optical communication products.

Achievements/Tasks

- Performed Performance testing and debug and compare the measurement parameter values of Agilent Oscilloscopes and in house SD Oscilloscope, The in house SD Oscilloscope saved several 10's of million dollars for the company.
- • Migrated database of EEPROM Editor Utility from MS Access to SQL Server. • UI development of features requested by Product Engineers and customers • Documentation for the features developed.
- Platform and Languages: VB.NET, Visual Studio, Eclipse, Windows XP/7, GDB, MySQL

Ipoh, Malaysia

Senior System Engineer IBM

05/2011 - 06/2013

Gurgaon, India

Achievements/Tasks

- Designed and developed a tool for migrating Teradata customers to Netezza (an IBM Dataware Housing Product) The entire code structure and data in Teradata was migrated to Netezza, this included changing Teradata specific BTEQ to Unix Shell Scripts and SQL and Teradata specific DDL's and DML's to NZSQL using Perl and do performance testing. To target Telecom/Mobile and banking customers across geographies to use this tool for their migration activities.
- The project was completed before the deadline and saved customer high Teradata maintenance cost.
- Data Migration and Visualization, ETL
- Languages : NzSQL, Perl, Unix Shell Scripting, BTEQ Environment : Linux

Senior Software Engineer Stone Apple

03/2010 - 01/2011

Kuala Lumpur, Malaysia

Client : IBM

Achievements/Tasks

- Project based on ITNM (IBM Tivoli Network Manager) ITNM provides the features necessary to manage complex networks. These features include network discovery, device polling, including storage of polled SNMP data for reporting and analysis, and topology visualization. In addition, Network Manager can display network events, perform root-cause analysis of network events (Cisco Nexus switches), and enrich network events with topology and other network data.
- To discover the devices (layer 2 and layer 3) on the NMS and to develop new agents for the devices if the devices are not yet supported. Enhancements on current agents to discover connectivity's and show topology on NMS
- Installing patches, server installation
- Language : Python . Platform : Solaris and Linux Database : MySQL, Oracle

Senior Engineer Tellabs

09/2005 - 02/2010

Gurgaon, India

Tellabs advances telecommunications networks to meet the evolving needs of users. Solutions from Tellabs enable service providers to deliver high-quality voice, video and data services over wireline and wireless networks around the world

Achievements/Tasks

- Projects were based on SDH, MPLS based Network Management Systems of 6300NM of Tellabs. New Features were being added as per customer requirement and internal enhancements in Tellabs Network Manager.
- • Provided analysis, design, and participated in development of key features. • Build , test and deliver the code to the test team • Build master, provided executables (kits) during every 3 months delivery cycle. • Implemented code in C++ to create / enhance modules that provided feature functionality. • Added Functionality to existing Access Modules (AM) and Functional Modules (FM). • Porting of C++ Code from HP/UX to Solaris.
- Worked with counterparts in Denmark for projects and went to a 2 weeks business trip in January 2008 to Tellabs Denmark to kick off a project on introduction of OTN layer on SDH Network (Optical).
- Languages : C++, Shell Scripting. Platform : Sun Solaris, SQL Server 2005.

ACHIEVEMENTS

Awarded third prize in a technical contest (Hack day) held in IBM Malaysia in October 2010 for suggesting Hadoop as an alternate to conventional database for storing and retrieving Performance Management Data.

Received Certificate of Excellence for outstanding performance to Tellabs 6300 Feature Pack 3.0.8

ACHIEVEMENTS

Awarded by C.B.S.E a National Scholarship Scheme Certificate for scoring 95% marks in Social Sciences and Physics in Class X and XII respectively

Represented Nokia and participated in the Mobile World Congress-2019 event in Shanghai

Received special recognition award from Coriant in 2017 for the excellent contribution and dedication.

Attended Nokia Bell Labs AI Conference 2019 – A 3 day Annual event in Bell Labs.
