

LAXMA REDDY.G

Email: laxmareddy.gangireddy@gmail.com

Phone: +919032233718

Profile:

A dynamic Senior Software Engineer with 8+ years of experience in driving technical excellence and innovation across diverse industries. Adept at leading cross-functional teams, delivering complex projects and creating scalable software solutions. Proficient in multiple programming languages like C/C++, Python, .Net, MATLAB and FORTRAN.

Work Experience:

Aventra group Pvt Ltd

Senior Software Developer

October 2024 to Present (> 5 years)

- Working on the “Rule Engine” Library which is used to implement the ship rules in ship design. It includes analysis and implementation of the theoretical concepts. Developing interfaces from C++ to python.

Cyient Pvt Ltd

Lead Software Developer

September 2018 to October 2024 (6 years)

- Lead a team of 5 software Engineers for Algorithm’s Development and testing for Core Protection Calculator System. The Algorithms were developed in C/C++ programming language and delivered a head of the schedule which received client’s appreciation.
- Worked on application development to determine the best estimate neutron flux and associated uncertainty at the measurement location using Python.
- Lead a team of 3 for Verification and validation of applications developed in FORTRAN and Csh script.
- Worked on Flat Panel Display System (FPDS) interface to map commands and data between plant model computer data base and the FPDS shared memory to drive the simulated safety display system. The interface is developed in C/C++ programming language.

Altech Power and Energy Systems Pvt Ltd (Currently ALPES AI)

Research Engineer

June 2012 to July 2015 (3 years)

- Lead a team of 3 in success full completion of Application development for Stage/impeller selection and Performance Evaluation of Multistage Centrifugal Compressor. It includes the adoption of in house-built impellers. The programming languages used for application development are C/C++, FORTRAN, and Java.
- Worked on application development for Generation of Geometrical data (Scaling geometry) of 3-D impeller of a centrifugal compressor. The programming languages used for application development MATLAB and OCTAVE.
- Worked on application development for Estimation of Combined Critical Speeds of a 660 MW Turbine – Generator rotorsystem. The programming languages used for application development MATLAB and FORTRAN.
- Worked on application development for Power Plant Performance Management/Optimization and Diagnostic System(PowerPOD) which is used for operating cost optimization. The programming

languages used for application development MATLAB, FORTRAN, and Java.

Educational Qualifications:

- ✓ Master of Technology from JNTUH University College of Engineering.
- ✓ Bachelor of Technology from JNTU Hyderabad.

Skills:

- Programming: C, C++, Python, FORTRAN, Ansys SCADE, .NET, MATLAB, OCTAVE, Core java, Excel VBA, Swig, CMake
- Database: SQL
- Tools: Microsoft visual studio 2015, 2019, Hypermesh, ANSYS Mechanical APDL
- Operating system: Windows, Red hat, SUSE

Declaration:

I solemnly declare that all the above particulars are true, complete and correct to best to my knowledge.

July 2025
Hyderabad
