

SUMMARY

Full-stack developer with 7+ years of experience in designing and building scalable web applications using JavaScript (React, Node.js), C#, and Java. Skilled in both frontend and backend development, with additional expertise in DevOps (Kubernetes, Helm, CI/CD). Currently expanding into Artificial Intelligence and Machine Learning, with hands-on experience in Python, data analysis (Pandas, NumPy, Matplotlib), and foundational ML concepts. Passionate about leveraging software engineering and AI to create innovative, data-driven solutions. Seeking opportunities in growth-oriented organizations where I can contribute to product development while advancing in AI/ML engineering.

KEY SKILLS

Frontend: Angular, Vue.js, JavaScript (ES6+), TypeScript, HTML5, CSS3

Backend: Node.js, PHP, C#, Python, Django and Java

Databases: SQL, MongoDB, Redis, Postgres

Messaging & APIs: Kafka, RabbitMQ, gRPC, REST, Socket.io

DevOps: Kubernetes, Docker, Jenkins CI/CD, Helm

Cloud: AWS (Lambda, EC2, SES, S3), GCP APIs (Google Location Services, Distance Matrix API, Google Drive API)

Testing & Monitoring: Jasmine, Puppeteer, JMeter, New Relic

Other Tools: Git, WordPress, Elementor

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Jul '22 - Present

Larsen & Toubro Infotech (now LTIMindtree)

Navi Mumbai, India

- Demonstrated initiative by assuming complete ownership of features, encompassing both **frontend and backend** development, ensuring comprehensive and cohesive solutions.
- Communicated with stakeholders** and translated their needs to technical requirements for providing effective solutions
- Implemented Redis queueing** across pods to reduce base microservice load and improve scalability.
- Converted C# Console app to Node.js with named pipe architecture, **boosting performance by 300%**
- Developed and Integrated **gRPC services** for efficient inter-service communication
- Employed insights from **New Relic monitoring** to analyze and proactively address the performance bottlenecks to ensure optimal system responsiveness and reliability
- Collaborated effectively with the **SRE team during critical client issues**, actively participating in war room sessions to resolve challenges, ensuring minimal downtime.
- Participated in **cross-functional collaboration** with teams across different time zones, contributing to the development of features and resolving interdependent issues
- Deployed and monitored** Kubernetes pods, implemented Horizontal Pod Autoscaler (HPA) for scaling.

Full Stack Developer

Aug '21 - Jul '22

Mobiotics Private Limited

Bangalore, India

- Implemented **payment gateway integrations** (Paytm, Easebuzz, Mobikwik) and developed **cron jobs** for transaction automation, ensuring **100% timely processing**
- Designed and developed an **SMS Dashboard and worker system** for bulk communication, enabling the delivery of **10,000+ messages per day** and improving customer outreach effectiveness
- Utilized the **H8 ticketing system** to provide vendors with comprehensive ticket details based on ticket category.

Full Stack Developer

Jul '18 - Jul '21

Meddco IT Healthcare Services

Mulund, Mumbai

- Driven the development of an **end-to-end website**, overseeing the entire project lifecycle from conception to deployment, ensuring high quality and user satisfaction
- Engineered a **multi-search platform** featuring advanced filtering and parameter options, enhancing user experience and enabling efficient data retrieval.
- Designed and **developed a CRM** system tailored for lead generation, encompassing both inbound and outbound strategies, resulting in improved lead management.
- Handled the integration of various **APIs**, including geocoding, reverse geocoding, SMS, and CC Avenue Payment Gateway API,

enhancing platform functionality and enabling seamless third-party interactions.

- Integrated **Google Maps APIs**, including Directions, Distance Matrix, Places, Geocoding, and Geolocation, to calculate ETA, enhancing location-based services.
- Built a Hospital Management Information System (**HMIS**) with integrated billing functionality, streamlining healthcare operations and facilitating efficient transaction processing.
- **Led and executed SEO initiatives** to enhance search engine visibility while collaborating with teams.

PERSONAL PROJECTS

Social Media Platform Present - Present

Developing a social media platform

Github URL: <https://github.com/ParinNagda/pairing> (**Private repo**)

E-commerce website with Cart Present - Present

Developed a e-commerce platform including shopping cart and payment workflows

Github URL: <https://github.com/ParinNagda/NodeShop.git>

Blog using Django Present - Present

Created a blog page leveraging Django framework

Github URL : <https://github.com/ParinNagda/django-blog-project.git>

EDUCATION

B.Tech Electronics and Telecommunication Jan '14 - Jan '18

K. J. Somaiya College of Engineering Mumbai, Maharashtra

CGPA: : 6.71/10

CERTIFICATIONS

- Completing a course on Math for Machine Learning: Linear Algebra
- Completed a course on Kubernetes for the Absolute Beginners - Hands-on
- Completing a course for Machine Learning from University of Stanford by Andrew Ng.

CONFERENCES & PUBLICATIONS

- Published and presented a paper for Intelligent Delivery System with Warehouse Sorting at International Conference on Research Trends in Engineering, Applied Science and Management a Osmania University Centre for International Programmes.

ADDITIONAL INFORMATION

Languages: English, Hindi, Marathi, Gujrati
