

ABDUL SHAHEEN SHA

AI Engineer | Full-Stack Developer | Certified Cloud Solutions Architect

✉ abdulshaheensha@gmail.com | ☎ +91-9597533439

📍 Hyderabad, India | 🔗 <https://linkedin.com/in/abdul-shaheen-sha>

PROFESSIONAL SUMMARY

- **Technical Lead Software Engineer at Microsoft** with 12 years of experience building scalable distributed systems and leading cross-functional teams.
- Proven track record of improving system reliability from 70% to 90% while handling 2M+ daily transactions. Expert in cloud-native solutions using Microsoft Azure, .NET ecosystem, and modern front-end frameworks.
- Passionate about driving digital transformation and delivering user-centric software products with focus on performance, scalability, and maintainability.

Core Competencies: Full-Stack Development • Cloud Architecture • Technical Leadership • Distributed Systems • DevOps • Agile Methodologies • AI-driven development • Testing strategies • Monitoring & Alerting

TECHNICAL SKILLS

- **Programming Languages:** C#, JavaScript, TypeScript, SQL, JSON, KQL, PySpark
 - **Frameworks & Libraries:** .NET Core, ASP.NET Core, React, Angular, Redux, Entity Framework / EF Core, Ninject, AutoFac, XUnit, MsTest, Jest, Enzyme, Playwright
 - **Cloud Platforms:** Microsoft **Azure** (Compute, Storage, Security, Networking & Messaging) – KeyVault, App Service, Functions, Data Factory, Databricks, Synapse, CosmosDB, Container Apps, Kubernetes Service, Service Bus, Event Grid, AI Search
 - **Databases:** SQL Server, Azure CosmosDB, NoSQL, Vector DB
 - **DevOps & Tools:** Docker, Kubernetes, Terraform, CI/CD, Git, Azure DevOps, MSBuild
 - **Architecture:** Microservices, Serverless, Event-Driven Architecture, RESTful APIs
 - **Monitoring & Analytics:** Kusto, Application Insights, Power BI, Azure Monitor, PagerDuty, ICM
 - **Methodologies:** Agile, TDD, BDD, Pair Programming, Code Reviews, SAFe®, Test Driven Development, Behaviour Driven Development, Domain Driven Design
-

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Microsoft | Mar 2022 – Present | Hyderabad, India

• **AI/ML Contributions:**

- § Contributed to a few of the initiatives in Microsoft such as leveraging Gen AI to write code, unit test and review pull requests by conducting brown-bag sessions.
- § Leveraged ML & PySpark to power up a skill recommendation engine that helps automatically upskill the talent profiles based on their credentials and project contributions, which has helped increase the staffing efficiency by 65%.

§ Caused a spike in developer productivity impacting 450 engineers in the org by onboarding 100s of code repositories in Microsoft to MerlinBot agent to enable GenAI-assisted code reviews to get faster feedback for trivial code issues and to give back time to the engineering team to review the complex flaws in the newly written code.

- **Enhanced System Reliability:** Improved Report Submission pipeline reliability from 70% to 90% for the product *Defender for Outlook*, processing 2M+ daily customer transactions through advanced error handling, instrumentation, and automated recovery mechanisms

- **Talent Management Platform:** Architected and developed Connected Platform Engage360 workbenches managing 350K monthly customer engagements across multiple Microsoft business units

- **Data Engineering:** Designed scalable data solutions using Azure Data Factory, Synapse Analytics, Databricks, Cognitive Search, and Cosmos DB for high-volume data ingestion and processing

- **Business Intelligence:** Delivered actionable insights through Azure Application Insights telemetry and Power BI analytics dashboards

- **Technical Leadership:** Mentored junior developers and drove adoption of best practices across engineering teams

Software Engineer | A.P. Moller – Maersk | Nov 2021 – Mar 2022 | Bangalore, India

- **Real-Time Tracking System:** Developed global cargo container tracking solution enabling real-time monitoring of vessel capacity and routes for operational efficiency

- **Microservices Architecture:** Implemented event-driven asynchronous communication patterns across distributed microservices

- **Infrastructure Automation:** Leveraged Apache Kafka for event streaming and Terraform for infrastructure-as-code deployment automation

- **Cloud-Native Solutions:** Built scalable Ocean Capacity Management platform using modern cloud technologies

Lead Software Engineer | DealerSocket | Mar 2020 – Oct 2021 | Bangalore, India

- **Team Leadership:** Built and led 8-member engineering team, achieving feature delivery within 1 month of team formation

- **Technical Mentorship:** Provided technical guidance, conducted code reviews, and resolved complex technical blockers ensuring on-time project delivery

- **CRM Enhancement:** Improved automotive dealership CRM solutions enhancing customer vehicle buying experience

- **Micro-Frontend Architecture:** Developed modular front-end solutions using React, Redux, Angular, and iframe integration patterns

Senior Software Engineer | Epicor | Oct 2018 – Feb 2020 | Bangalore, India

- **Cloud Migration:** Successfully migrated data-intensive ERP desktop applications to Microsoft Azure cloud platform
- **Application Modernization:** Transformed legacy ERP systems into responsive web applications using Angular and ASP.NET Core
- **Performance Optimization:** Achieved significant performance improvements through cloud-native architecture patterns

Software Engineer | Siemens Healthineers | Jul 2013 – Oct 2018 | Bangalore, India

- **Modern Development Practices:** Introduced TDD, BDD, and Pair Programming methodologies supporting Continuous Delivery initiatives
- **Multi-Tenant SaaS:** Architected and developed scalable SaaS applications using Azure, ASP.NET Web APIs, Angular, and SQL Server to handle DICOM(from RIS) and HL7(from HIS)
- **Security Implementation:** Enhanced application security through Azure Key Vault data encryption supporting medical device compliance & HIPAA standards
- **Diagnostic Tools:** Created web-based diagnostic applications for global service engineers using ASP.NET MVC and modern front-end technologies
- **Global Fleet Monitoring:** Developed comprehensive tracking system for scanner machine fleets worldwide using ASP.NET and SQL Server

EDUCATION

Bachelor of Engineering, Electronics and Communication

CGPA **8.74 out of 10** | First Class with Distinction

College of Engineering Guindy, Anna University, Chennai | 2009 – 2013

CERTIFICATIONS

- Microsoft Certified: **Azure Solutions Architect Expert** (AZ-303, AZ-304)
- Microsoft Certified: **Azure AI Fundamentals**
- ISTQB: **CTFL (Certified Tester Foundation Level)**

- LinkedIn Learning: **DevOps Foundations**
- LinkedIn Learning: **Software Architecture Foundations**
- LinkedIn Learning: **TypeScript for C# Programmers**
