

SUMMARY

Technical Specialist with 10+ years of experience specializing in backend development and cloud technologies. Strong background in API development, microservices architecture, cloud-based solutions (AWS), and database optimization. Proven track record of leading cross-functional teams, ensuring code quality through automated testing and implementing Agile methodologies to meet tight deadlines. Passionate about building secure, maintainable, and high-performance software systems that drive business growth

EXPERIENCE

Software Technologist II06/2017 - Present

PhilipsBengaluru, India

- Led migration of monolithic applications to AWS-based microservices architecture, reducing operational costs by 35%
- Containerized 100% of applications using Docker, streamlining deployment workflows.
- Developed microservices architecture using Kubernetes, resulting in a 40% increase in deployment speed while reducing infrastructure costs.
- Integrated .NET-based applications with cloud platforms, improving scalability and performance metrics by over 25%.
- Conducted frequent code reviews and mentorship, resulting in a 30% reduction in code-related incidents considerably improving team output.
- Played a key role in developing a scalable API service using .NET Core, reducing processing time by 25% and enhancing user experience.
- Collaborated in a cross-functional team to integrate cloud-native services, leading to a 40% decrease in operational costs.
- Reduce memory leakage, resource optimization from the project up to 90% using various tools like re-sharper dot memory, .net memory profiler, Grafana.
- Implemented Redis Cache mechanism allowing application to store and retrieve data at extremely low latency.
- Implemented secure authentication using AWS IAM Token for accessing EC2, S3 services in microservice environment
- Developed token expiration and renewal strategies in C#/.net application to ensure secure and seamless AWS resource access.
- Worked on a POC which was an enabler in developing react based application which is used for Device Registration.

Senior Software Engineer06/2014 05/2017

InfosysBengaluru, India

- Worked on windows application which allows user to create template and send letters to the customers protections.
- Worked on SQL Server Integration Services(SSIS) which helps in perform various business critical operations by extraction data from various sources like database, file etc.
- Developed WPF MVVM based application.

EDUCATION

Bachelor of Technology in IT	05/2008 - 07/2012
Amity University	Lucknow, India
12th	04/2006 - 03/2007
Sunbeam School	Varanasi, India
10th	04/2005 - 03/2006
Sunbeam Schools	Varanasi, India

SKILLS

Microsoft .NET Framework : .net Framework 4.7 .net 6, .net 8, C#

Container Technology: Docker, Kubernetes, Docker Swarm

Messaging Technology: MQTT, RabbitMQ

AWS: EC2, ECS, EFS

Database: SQL, MongoDB

Cache Mechanism: Redis Cache

Web Technology: HTML, CSS, JavaScript, ReactJS

PROJECTS

Philips Remote Services

PRS Portal is the tool of Remote Services, a user interface supported by an adaptable and scalable architecture. Ability to launch remote service applications using RSN or PSA or IoT based connectivity.

Connectivity Client

Connectivity Client abstracts the connectivity to IoT on premise or cloud and provides standard 'Service Interface' to device irrespective of connectivity type.

Remote Tool Service

RTS is mainly focusing on the remote capabilities (device registration, file transfer etc.) for healthcare devices. PSC Remote Suite provides UI Apps and Toolkit on top of Connectivity Client for E2E Remote Serviceability Type

Philips Support Connect

It is an On-Device platform enabling maintenance with a harmonized user experience. It includes integration, remote capabilities and service platform applications. It is used by the Business Units to host their own application

ACHIEVEMENTS

Recognized with the "Living The Behaviour Award" for demonstrating the Philips behaviour "TAKE OWNERSHIP TO DELIVER FAST"

Recognized with the "Living The Behaviour Award" for demonstrating the Philips behaviour "Quality And Integrity First "

Lead the team in the AWS ML competition and ranked third in philips

I was awarded with "Insta Award" from Infosys for my outstanding work in the team
