PROFESSIONAL SUMMARY

Accomplished Full Stack Developer with over 12 years of experience in designing, developing, and deploying scalable web applications across diverse domains. Proficient in both frontend and backend technologies, with a strong command of modern frameworks, microservices architecture, and cloud platforms. Seeking a challenging role to leverage full stack expertise, problem-solving skills, and a passion for innovation to build high-performance solutions and contribute to the success of a forward-thinking organization.

CORE COMPETENCIES

- Full Stack Development
- Microservices Architecture
- API Integration (REST)
- Cloud Computing (AWS)
- DevOps & CI/CD Pipelines
- React / Angular / Vue.js
- Node.js
- SQL & NoSQL Databases
- Agile & Scrum Methodologies
- Containerization
- Code Review & Mentoring

IT SKILLS

- Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS, NodeJS, Python
- Frameworks / Libraries:** Angular, Vue, React, Bootstrap CSS
- Build Tools:** Webpack, Vite, npm, pip
- Version Control:** Git, GitHub
- Testing:** Vitest, Jasmine
- Databases (Basic Front-End Usage):** RDS & NoSQL Database
- Tools:** VS Code, Figma, Swagger, GitHub Copilot, Jira, Jenkins, Rancher, Kubernetes, ArgoCD
- API Integration:** RESTful APIs, Websocket

WORK EXPERIENCE

Financial.com, Kochi, India

Feb 2022 – Present

Front-End Developer

- Work as part of a high-performing Agile team to design, develop, and manage innovative products and portable widgets for the financial and stock exchange sectors.
- Leverage modern technologies such as Java (Spring Boot), JavaScript, and Vue.js to build scalable and responsive applications.
- Embrace DevOps best practices, utilizing Jenkins and Kubernetes to enable efficient continuous integration and seamless deployment pipelines.
- Drive product quality by conducting in-depth code reviews, writing robust unit tests, and ensuring adherence to coding standards and performance benchmarks.

IQVIA, Kochi, India**Jun 2020 – Feb 2022***Senior Software Developer*

- Developed and maintained frontend applications for insurance vendor products using Angular and React.
- Designed user-friendly interfaces and implemented responsive UI components aligned with business requirements.
- Led the development of a test application to migrate an Excel-based reporting tool to a web platform, utilizing Angular for the frontend and Python for the backend.
- Collaborated with cross-functional teams to integrate frontend components with backend services for seamless functionality.
- Mentored and trained interns, providing technical guidance and fostering their skill development within the team.
- Contributed to improving development workflows and best practices within the frontend team.

Baker Hughes, Kochi, India**Sep 2019 – May 2020***Senior Software Engineer*

- Developed a robust Angular-based web application tailored for the oil field services industry.
- Transformed operational data into predictive insights by integrating historical data analytics.
- Designed intuitive user interfaces to support data visualization and user-driven decision-making.
- Collaborated with domain experts to define functional requirements aligned with industry needs.
- Optimized application performance to ensure smooth data processing and real-time updates.
- Maintained and updated the application regularly to incorporate enhancements and address user feedback.

Knowledge Lens Pvt Ltd, Bengaluru, India**Jan 2015 – Sep 2019***Technical Lead*

- Developed and maintained web applications using MVC frameworks like Angular and Backbone.js, focusing on ETL tools, analysis platforms, and configuration utilities for IoT industries.
- Built reusable UI components for Angular-based projects, enhancing code maintainability and development efficiency.
- Collaborated with teams working on Big Data solutions to align UI functionality with complex data processing needs.
- Performed Hadoop administration and support tasks using Cloudera clusters to ensure stable data operations.
- Led the migration of a legacy Python application to a serverless architecture using AWS Lambda.
- Optimized backend performance by refining SQL queries and streamlining data access in the new serverless environment.

PREVIOUS ASSIGNMENT

-
- **Amrita Center for Cyber Security, Kollam, India | Research Associate** **Jun 2013 – Dec 2014**
 - Contributed to research projects focused on network security protocols and data encryption methods.
 - Managed and maintained the center's network infrastructure and research servers, ensuring high availability for ongoing projects.
 - Engineered a proof-of-concept real-time web application using Node.js, Express, and WebSockets to demonstrate live data processing and monitoring.

EDUCATION

- Master of Science, Computer Science, Amrita School of Arts and Science - Kollam, Kerala, Jun 2013

TRAINING AND CERTIFICATIONS

- DevOps Post Graduate Program by Caltech through Simplilearn Online Learning Platform

LANGUAGES

- English, Hindi, and Malayalam
