

Abhishek Kumar

Phone: +91 99450 45 732

Email: abhishekkumar.ramkrishna@gmail.com

Professional Summary

IT software professional with **9+ years** in software industry. Proven expertise includes over **2+ years** as a **Technical Lead**, where I successfully managed multiple project deliveries in parallel and provided technical solutions to complex business requirements. Skilled in **Front end development**, using **Angular** and **Node.js**. Adept at leveraging full-stack knowledge to build interactive and user-centered website designs, consistently ensuring optimization and robust functionality.

Education

Bachelor of Engineering in Electronics & Telecom | Nagpur University | Nagpur, Maharashtra | August 2013

Senior secondary (12th) | CBSE Board | Patna, Bihar | July – 2008

Secondary (10th) | CBSE Board | Patna, Bihar | June – 2006

Skills

Category	Skills
Programming Languages	JavaScript, TypeScript, HTML, CSS, Core Java
Frameworks and Libraries	Angular 10+, Node.js, Express Js, Bootstrap, NVM, SAAS, RxJs, Angular CLI, Jest, Jasmine, Serenity
Development Tools	Git, GitHub, Docker, Jenkins, Azure Pipelines, CI/CD, Bitbucket
Database Management	MongoDB
Project Management Tools	Azure DevOps, Jira
Cloud Application	Azure Portal
Generative AI	GitHub Copilot prompts
IDE	Vs Code, Eclipse, IntelliJ
Operating Systems	Windows, MacOS
SDLC Models	Agile Methodologies, Waterfall Model
Domian	Energy & Resources, e-commerce, Retail, Finance, Travel & Tourism

Professional Experience

- Currently designated as a Consultant at **Deloitte USI**, Bengaluru, from January 2018 to Present.
- Worked with **Cigniti Technologies Limited**, Hyderabad, as SDET Engineer from September 2016 to August 2017.

- Worked with **Software Paradigms Infotech Pvt Ltd (Currently Cognizant)**, Mysuru, from March 2015 to July 2016 as Associate software Engineer.

Roles & Duties

Technical Lead | March 2023 - Present

Project Details: *Exelon: Billing & Payments | USA | March 2023 – Present*

Exelon: Electric Vehicle - TOU | USA | July 2024 – Present

Exelon: Daily Time of Use | USA | February 2025 – Present

Project Requirements Gathering: Collaborate with stakeholders, product owners, and business analysts to gather and analyze project requirements, ensuring a clear understanding of business needs and objectives.

Technical Solutions: Provide technical solutions to complex business requirements, leveraging expertise in software development and system architecture for **Web Development, Responsive Development, Accessibility Development**.

Project Development Roadmap Planning: Develop and maintain project development roadmaps, outlining key milestones, deliverables, and timelines to ensure successful project execution.

Coordination and Communication: Coordinate with product owners, stakeholders, business analysts, UI designers, QA teams, and development teams to streamline project delivery and ensure alignment across all project phases.

Parallel Project Management: Manage multiple project deliveries / releases in parallel, ensuring that each project progresses smoothly and meets its deadlines.

Sprint Planning and Execution: Plan and drive sprint activities, allocating daily tasks to the team and ensuring timely project delivery.

Team Leadership and Mentorship: Lead and mentor junior developers, providing guidance and troubleshooting technical challenges to foster a collaborative and productive team environment.

Code Review and Quality Assurance: Conduct code reviews to maintain code quality and adherence to development guidelines and collaborate with the QA team to define test cases, metrics, and resolve questions about test results.

Technical Documentation: Develop technical documentation to define system components, development environments, and implementation strategies.

development environments, and implementation strategies.

Continuous Improvement: Recommend business process flow improvements and communicate problem/resolution processes to project management, ensuring continuous improvement in project delivery and performance.

Hands-On Angular and Node.js Development: Engage in hands-on development of web applications using Angular and Node.js, implementing best coding practices and design patterns.

Developing Angular Modules: Create and maintain reusable Angular modules, components, and services to enhance application functionality and maintainability.

REST API Development: Design, develop, and deploy RESTful APIs to support front-end functionalities and ensure seamless data exchange between client and server.

API Integrations: Integrate third-party APIs and internal services to extend application capabilities and provide enriched user experiences.

Middleware System Integrations: Implement and manage integrations with middleware systems to facilitate data flow and communication between disparate systems, ensuring robust and scalable solutions.

Senior Development Engineer | March 2020 – February 2023

Project Details:
USA

Exelon: Manage My Accounts |

- Created and managed Angular modules for **web apps**.
- Designed and implemented Angular features for **responsive** devices.
- Developed and maintained the website to ensure **accessibility** compliance.
- Developed a **REST API** utilizing Node.js and Express.
- Developed and implemented **API integrations**.
- Evaluated business requirements to determine appropriate technical solutions.
- Worked with internal teams and vendors to address and enhance product experience and performance.
- Conducted **code reviews**, granted approvals, and merged codes for the team.
- Managed **deployments** in project tier environments and released features for testing.
- Fixed high-priority bugs for smooth product delivery.
- Addressing technical issues faced by the team and overcoming challenges to restore team progress.

Software Development Engineer: Angular | March 2018 – January 2023

Project Details:
UK

Dyson | London -

- Developed and maintained modules in Angular applications.
- Contributed to fixing high-priority and critical bugs, ensuring the delivery of a robust application.
- Identified, prioritized, and executed tasks in the software development life cycle 7.
- Collaborated with internal teams and vendors to fix and improve products 8.
- Implemented a new Angular-based e-commerce platform, leading to a 35% increase in sales and a 20% increase in customer retention.
- Wrote extensive unit tests and end-to-end test suites for all components, resulting in a 90% reduction in bug-related delays and a 15% increase in overall code quality.

- Analyzed test cases and translated them into automation scripts.
- Guided the automation team by troubleshooting automation challenges and blockers.
- Analyzed test execution results, performed daily build health check-ups, and addressed issues with appropriate actions.

Software Engineer- II: SDET | October 2017 – September 2018

**Project Details: National Pension System| Karvy Computer Share |
Hyderabad**

- Performing in the role of ADA (automation development authority) for the project.
- Driving project test automation which includes planning of automation roadmap for the project in direct coordination with client/onsite counterpart/Leadership.
- Technical designing of automation tasks for the team.
- Planning and driving the sprint activities.
- Allocating daily task to the team.
- Reviewing code, approving, and merging for the team.
- Analyzing the test case and translate them into Automation script.
- Guiding automation team by troubleshooting automation challenges and blockers.
- Analyzing test execution result, daily build health check-up and addressing with appropriate action on it.

Associate Software Engineer: SDET | March 2015 – July 2016

Project Details: MCAT | Macy's | Atlanta - USA

- Writing automated tests to execute regression, sanity, and functional tests.
- Identifying UI defects and fixing them in the code.
- Analyzing test cases and translating them into automation scripts.
- Writing automation test scripts.
- Executing test scripts and performing regression testing on a daily basis.

- Fixing front-end failures based on regression test results.
